

IMS, Energy & Sustainability Policy

To build IMDAAD as a brand in GCC with the vision of being a Market Leader in professional Integrated Facilities Management solutions & services and its commitment to excellence, Imdaad is committed to:

- Achieve leading position in Integrated Facilities Management that is secured through outstanding levels of employee and customer satisfaction.
- Protect the health and safety of everyone involved in the execution of our solutions & services.
- Preserve the natural resources of environments in which we live and work in terms of any environmental impact resulting from our processes.
- Implement the most efficient and cost-effective usage of energy aligned in the protection of environment and implement action plans derived from energy planning & review to achieve the highest level of energy performance.

We strive to make conscientious and sustainable business decisions that are good for our people, stakeholders, communities, and the environment.

In our quest to achieve world-class EHSQ, Sustainability and Energy Efficiency excellence and the above objectives, our management team is committed to:

- Meet or exceed the regulatory and statutory requirements of the UAE - EHSQ and Energy Efficiency laws and regulations of the communities in which we live and work. In locations where applicable laws and regulations do not exist, we will apply sound EHSQ and Energy efficiency practices such as engineering controls, work practices, management practices and personal protective equipment to protect all stakeholders including the environment.
- Provide safe and healthy working conditions for the prevention of work-related injury and ill health continuously protect the environment and improve Energy performance by creating acceptable EHSQ and Energy Efficiency standards and hold all of our operations accountable to these standards.
- Continue with our EHSQ and Energy efficiency auditing programs to assure compliance with not only regulatory requirements but also our own internal standards and contractual requirements.
- Set aggressive EHSQ and Energy efficiency goals to eliminate hazards and reduce occupational health and safety risks and all forms of waste. Leaders throughout our organization will be held accountable and progress will be measured towards EHSQ, Sustainability and Energy efficiency excellence.
- Strive to build positive community relations in the locations where we live and operate.
- Monitor emerging issues with respect to environment, health, safety and energy efficiency aspects as well as keeping information available and up to date on regulatory changes and technological innovations.
- Ensure the consultation and participation of employees or employee representatives.
- Ensure the availability of information and necessary resources to achieve the energy objectives and targets as well as support procurement of energy efficient products and services.
- Utilize best practices and lessons learned as means to continuously improve.

All of our businesses are responsible for implementing this policy, assuring that the proper human and monetary resources are allocated to create and implement the necessary programs to build the culture that will allow us to achieve world-class EHSQ, Sustainability and Energy efficiency excellence.

This Policy applies to all sites and communities in which we live and operate, will be communicated to all Imdaad Staff and will be distributed to interested parties and to members of the public on the request.

We will regularly review this policy, performance and management systems to ensure they remain relevant and continually improved.
